

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application. Independent claims 198 and 212, and dependent claims 202, 210, 222, 247, and 252 are amended.

Claims 198 and 212 are amended to include a fold line that includes the weakened line segment. Claims 198 and 212 are further amended to include that the weakened line segment does not extend through the label and that the weakened line segment is in the facestock sheet but not the liner sheet. Support for the amendment to independent claims 198 and 212 is found, *inter alia*, in paragraph [0005] on page 2, paragraph [0022] on page 6, FIG. 2, and FIG. 6 of the originally filed specification.

Claims 202, 210, 222, and 247 are amended to correct antecedent basis errors due to the amendment to independent claims 198 and 212, from which these claims depend.

Claim 252 is amended to correct a typographic error.

No new matter is added.

**Listing of Claims:**

Claims 1-197 (canceled).

Claim 198 (currently amended): A label sheet construction, comprising:  
a liner sheet;  
a facestock sheet adheredcoupled to the liner sheet, the facestock sheet having an edge:  
at least one cut line through the facestock sheet but not the liner sheetto form, the at least one cut line defining:  
a facestock sheet label that is releasably adhered to the liner sheet, the label having a portion, and  
a label-free waste portion that is part of the facestock sheet and outside of the label:  
a weakened line segment in the facestock sheet, to but not through the liner sheet, the weakened line segment is in the label-free waste portion outside of the label, in a label-free waste portion of the facestock sheet, and extendingand extends linearly between the at least one cut line that defines the label and an adjacentthe edge of the facestock sheet, the weakened line segment does not extend through the label; and  
the weakened line segment defining a straight line extending between the adjacent edge and another edge of the facestock sheet and passing through the label;  
the straight line in the label being free of weakened line segments;  
the straight line defining a fold line of the label sheet constructionthat includes the weakened line segment in the facestock sheet; and  
wherein the label sheet construction being configurable is configured to be manipulated into a label-portion graspable condition wherein awhere the portion of the label is separated from the liner sheet generally at the fold line with the liner sheet bent back generally on the fold line as a result of the liner sheet being folded along the fold line.

Appl. No. 09/954,621  
Amtd. Dated January 15, 2009  
Reply to Office Action of July 15, 2008

Claim 199 (previously presented): The construction of claim 198 wherein an end of the weakened line segment closest to the label is spaced a short distance therefrom by a short uncut section of the facestock sheet.

Claim 200 (previously presented): The construction of claim 198 wherein the weakened line segment engages at an end thereof the at least one cut line, and the weakened line segment and the at least one cut line together form a continuous die cut line in the facestock sheet.

Claim 201 (previously presented): The construction of claim 198 wherein the weakened line segment is an elongate continuous die cut line through the facestock sheet to the liner sheet.

Claim 202 (currently amended): The construction of claim 198 further comprising another weakened line segment on another side of the label and lying on the straight that is included in the fold line.

Claim 203 (previously presented): The construction of claim 198 wherein the label has a burst configuration with alternating long and short points.

Claim 204-206 (cancelled).

Claim 207 (previously presented): The construction of claim 198 further comprising adhesive coating an entire bottom surface of the label.

Claim 208 (previously presented): The construction of claim 198 wherein the weakened line segment is an elongate continuous die cut line.

Claim 209 (previously presented): The construction of claim 198 wherein the label-free waste portion of the facestock sheet surrounds the label.

Claim 210 (currently amended): The construction of claim 198 wherein the straightfold line is perpendicular to the edge of the facestock sheet.

Claim 211 (previously presented): The construction of claim 198 wherein the facestock sheet includes a non-label edge frame, and the weakened line segment is in the non-label edge frame.

Claim 212 (currently amended): A label sheet construction, comprising:

- a liner sheet having a first portion and a second portion;
- a facestock sheet adheredcoupled to the liner sheet, the facestock sheet having an edge;
- at least one cut line through the facestock sheet but not the liner sheet-to form, the at least one cut line defining:
  - a facestock sheet-label that is releasably adhered to the liner sheet, the label having a portion, and
    - a label-free waste portion that is part of the facestock sheet and outside of the label;
  - a weakened line segment in the facestock sheet-to but not through the liner sheet, the weakened line segment is in the label-free waste portion outside of the label, in a label-free waste portion of the facestock sheet, and extendingand extends linearly between the at least one cut line that defines the label and an adjacentthe edge of the facestock sheet, the weakened line segment does not extend through the label; and
    - the weakened line segment defining a straight line extending between the adjacent edge and another edge of the facestock sheet and passing through the label;
    - the straight a fold line in the label being free of that includes the weakened line segments-segment;
  - the label sheet construction being configurable in a first configuration wherein the entire label is adhered to the liner sheet and in an alternative second configuration wherein the first portion of the liner sheet is in a bent back position along the

straightfold line relative to at the second portion of the liner sheet and a the portion of the label is in a released condition relative to the first portion of the liner sheet and spaced from the liner sheet in a label-portion graspable position.

Claim 213 (previously presented): The construction of claim 212 wherein an end of the weakened line segment closest to the label is spaced a short distance therefrom by a short uncut section of the facestock sheet.

Claim 214 (previously presented): The construction of claim 212 wherein the weakened line segment engages at an end thereof the at least one cut line, and the weakened line segment and the at least one cut line together form a continuous die cut line through the facestock sheet.

Claim 215 (previously presented): The construction of claim 212 wherein the weakened line segment is an elongate continuous die cut line through the facestock sheet to the liner sheet.

Claim 216 (previously presented): The construction of claim 212 wherein the label has a burst configuration with alternating long and short points.

Claims 217-219 (canceled).

Claim 220 (previously presented): The construction of claim 212 further comprising adhesive which coats an entire bottom surface of the label.

Claim 221 (previously presented): The construction of claim 212 wherein the label-free waste portion of the facestock sheet surrounds the label.

Claim 222 (currently amended): The construction of claim 212 wherein the straightfold line is perpendicular to the edge of the facestock sheet.

Claim 223 (previously presented): The construction of claim 212 wherein the facestock sheet includes a non-label edge frame, and the weakened line segment is in the non-label edge frame.

Claims 224-230 (canceled).

Claim 231 (previously presented): The construction of claim 198 wherein the label sheet construction has 8 1/2 x 11 inch, 8 1/2 x 14 inch or A4 dimensions and is constructed to be sheetfed through a printer or copier to print indicia on the label to form a printed label on the liner sheet.

Claim 232 (previously presented): The construction of claim 212 wherein the label sheet construction has 8 1/2 x 11 inch, 8 1/2 x 14 inch or A4 dimensions and is constructed to be sheetfed through a printer or copier to print indicia on the label to form a printed label on the liner sheet.

Claims 233-245 (canceled).

Claim 246 (previously presented): The construction of claim 198 wherein the label is a rectangular label.

Claim 247 (currently amended): The construction of claim 198 wherein an end of the weakened line segment closest to the adjacent edge of the facestock sheet is spaced therefrom by a short uncut section of the facestock sheet.

Claim 248 (previously presented): The construction of claim 198 wherein the weakened line segment is a perforated line.

Appl. No. 09/954,621  
Amdt. Dated January 15, 2009  
Reply to Office Action of July 15, 2008

Claim 249 (previously presented): The construction of claim 198 wherein the weakened line segment is a continuous die cut line.

Claim 250 (canceled).

Claim 251 (previously presented): The construction of claim 212 wherein the label is a rectangular label.

Claim 252 (currently amended): The construction of claim 212 wherein an end of the weakened line segment closest to the label edge is spaced therefrom by a short uncut section of the face stock sheet.

Claim 253 (previously presented): The construction of claim 212 wherein the weakened line segment is a perforated line.

Claim 254 (previously presented): The construction of claim 212 wherein the weakened line segment is a continuous die cut line.

Claims 255-280 (canceled).
